

Creating New Lessons

Step 1: Pick a passage from the source text (the Unlocked Literal Bible) that uses as many words that have already been taught as possible.

Step 2: Break up the passage into short sentences with no more than seven words in a sentence.

Step 3: Find the Character and Extension cards for as many words as you can.

Step 4: Circle the words you cannot find.

Step 5: For each of the words you cannot find, check the Translator's Dictionary first to see if the word has already been created.

Step 6: Make a new Character or Extension card for each word that is not in the kit.

- For words that are in the dictionary, look for the basic characters that make up the word. Write the basic characters on the back of the card to use when teaching the word.
- For words that are not in the dictionary, create a new word.
 - When you create a new word, try to create an extension from the basic characters.
 - If the word is not related to any basic characters, you can create a new basic character. Remember the rules for creating a new basic character, which are:
 - It must be as simple as possible (so it can be made into an extension).
 - It must be intuitive.
 - It must be able to be taught using a picture.

Step 7: Add the word to the appropriate category in the Categorized-Word-List file for each new card. When you teach the cards, you will start with the lowest category and move up.

Step 8: Make the sentence cards for the lesson by writing down the SUN translation of the sentences you created in step 2. Make sure the sentences are in the right order before you teach it to the student.

Step 9: When you have the word cards and the sentence cards, you are ready to teach.

Step 10: Follow the Facilitator Instructions to teach the Scripture passage.
